Coordinators comments

Four out of 9 students completed the survey. The students seem to be pleased with the course. This was the first time I gave the course entirely online, which had pros and cons. It is more difficult to interact with the students online and to get feedback. However, it was much easier to mix lecture presentations and hands-on examples in R. Typically I gave a 30 minute lecture including an example, whereafter the students could try the examples themselves in R. This was much easier and convenient online.
