Coordinators comments

Most students seem content with most aspects of the course. It is a similar result as previous years and shows that I have planned a course that is working well. I plan to have the course very similar next year, but will update two of the exercises where I got feedback during the course that some edits to the text would be good. Even though I would have liked all students to complete the course evaluation, I think 12 students is a good enough number of replies. Not all 21 admitted students were active in the course so these 12 are actually are more than 57% of the student that actively participated.
